S. P. JAIN,
for Registrar General, India.

NATIONAL
SAVINGS
CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 2nd July, 1949.

REMARKS

The figures of births and deaths shown in this statement for week ending the 2nd July, 1949 relate to 179 towns with an estimated population of 23,409 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 84% of the total number of towns representing 90% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,263 and 9,091 representing birth and death rates of 29.5 and 20.2 per thousand of the population respectively.

(A) *Indian Provinces*.—The data here relate to 189 towns with an estimated population of 21,220 thousands. The total number of towns is 189 and their population is 23,320 thousands. Thus 84% of the total number of towns representing 91% of the total population is covered. The numbers of births and deaths recorded in these towns were 12,124 and

8,421 representing birth and death rates of 29.7 and 20.6 per thousand of the population respectively. The table at the end gives the position by provinces :—

Banaras in U. P. was the only town which had a high death rate of 53.2 per thousand of the population and this high death rate was mainly due to deaths from fevers.

(B) *Unions and States*.—The data here relate to 20 towns with an estimated population of 2,189 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 83% of the total number of towns representing 83% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,139 and 670 representing birth and death rates of 27.5 and 15.9 per thousand of the population respectively. No town recorded a high death rate of 50 or over per thousand of the population
